

Wrinkle & Cellulite Treatment

Baseline

Month 5 after 1 Treatment

Month 12 after 1 Treatment

Just One Treatment

No Surgery

Long-lasting Results

The Profound RF is a revolutionary device that is proven to stimulate the production of elastin, collagen, and hyaluronic acid, all of which result in firmer and tighter skin over time. It's FDA approved and a non-surgical procedure that combines micro-needling and radiofrequency energy.

With just one treatment, Profound RF has:

- Improved skin elasticity on the face, neck, décolleté and body
- Improved appearance to areas with cellulite on the thighs, buttocks, arms, etc.
- Lifted and tightened loose skin under the neck
- Improved the appearance and texture of sagging jowls
- Improved the appearance of the chin area including decreased double-chin look
- Smoothed fine lines, wrinkles, and deteriorating skin quality
- Tightened abdominal skin after weight loss or childbirth

Profound RF results develop over the weeks following the treatment. The patient photos above start with a before photo, the next is a photo after 5 months, the last photo is one year later. Simply amazing! The results from Profound RF typically last around 3 to 4 years.
